“Review of My Training Experience at Savory Minds – SECURE 2K25”

My self **Kamarthi Srinivasulu** , and I am currently part of the **SECURE 2K25 initiative by Savory Minds**. I am **CSE (Data Science) of final year student at the Dr K.V. Subba Reddy Institute of Technology ,Kurnool**. This program is a unique cybersecurity education platform started by Amit Kumar Sir, the Chairman of Savory Minds, aimed at bridging the gap between traditional college education and industry requirements through hands-on learning and real domain knowledge.

Before joining SECURE 2K25, I was searching for a training program that offered practical skills and genuine placement opportunities. I explored various coaching centers and online platforms, including popular hubs like NXT wave, but found common issues such as mixed batches, poor teaching quality, high fees, and lack of proper placements.

SECURE 2K25 stands out because it offers focused, research-based, and advanced learning within a few months, unlike the conventional four-year college programs. The training covers multiple domains including SOC Analyst, Penetration Testing, Bug Bounty, Cyber Automation, Blockchain, AI, Machine Learning, and Generative AI. Amit Kumar Sir’s teaching style is exceptional—he pays attention to every student and ensures clear, practical understanding, which even advanced AI tools cannot replicate.

Since joining, my technical skills, communication, and interview preparedness have improved significantly. The program is inclusive, welcoming students from any background or stream, and starts teaching from scratch with no language barriers. Moreover, the affordability of SECURE 2K25 is remarkable, offering value that would otherwise cost lakhs at other institutes, with flexible EMI options available.

This experience has transformed my understanding of cybersecurity and clarified my career path. I now feel confident and equipped to enter the industry as a real engineer. Amit Sir’s vision behind SECURE 2K25—to provide quality, hands-on education and break the cycle of unemployable engineers—is truly inspiring.

I am proud to be part of SECURE 2K25 and sincerely thank Amit Kumar Sir and Savory Minds for this life-changing opportunity.

“I feel proud to be a part of Secure 2K25 and thank Amit Sir and Savory Minds for this wonderful opportunity & I really missed that after go on this company”
