

Review

Hello everyone, I am Ravindra.

I am currently pursuing my B.Tech degree at G. Pulla Reddy Engineering College, and I'm from a CSE background. First, I want to tell you about an initiative called Secure 2K25, which was started by Amith Sir, CEO of Savory Minds. The main goal of this initiative is to provide hands-on learning and real domain knowledge for students.

Before joining this initiative, my situation was very bad. My technical and communication skills were not good, I didn't have proper domain knowledge, and there was no hands-on learning either - because our institutions don't teach everything. They only focus on completing their syllabus on time and try to make us learn by conducting tests without making sure we understand the concepts properly. I also tried many coaching centers and online courses, but they were all the same. Because for them, it's just a business. Many are fake, and even the genuine ones are like this.

But here, it's completely different. There is no time limit. It's a live online teaching format and they are ready to clarify our doubts at any time. They also repeat the topic as many times as needed until every student understands clearly and they even provide recorded videos for us.

Especially, Amith Sir's teaching style is completely unique - something we haven't seen before. Sir focuses on each and every student and if one student hasn't understood the topic, sir repeats it again and again until that student understands.

“It's like a loop - and the loop ends only when all students understand clearly.”

Sir's dedication and patience is unmatched. Amith Sir teaches us Cybersecurity.

Not only Cybersecurity, they are teaching us in different domains like:

- > SOC Analyst
- > Pen Testing
- > Bug Bounty Hunting
- > Cyber Automation
- > AI & ML
- > MERN Stack

They are offering all these domains at an affordable price, and we cannot compare this with any outside institution - because they would charge more than 10 lakhs for all the courses I mentioned, especially with hands-on experience.

I Suggest you guys, Investing your money here to develop your skills is really worth it, rather than wasting it on fake coaching centers.

This initiative was not started on a idea. Initially, Amith Sir visited colleges, directly interacted with students and asked about their problems. Then, sir decided to start this initiative and it's not as a business, but for students.

The company even planned a trip for us as a bonus. We went to Wonderla and enjoyed a lot. We also visited Chunchi Falls, and the company bore all our expenses.

I am very happy to be part of this initiative.

I am truly thankful to Amith Sir and Savory Minds for giving me this wonderful opportunity. Thank you, Sir.
