

REVIEW

Hello everyone, my name is T. Dharmanath. I am currently pursuing my B.Tech in Information Technology and I am proud to be a part of **SECURE 2K25**, an incredible initiative by **Savory Minds**.

what is Secure 2K25 :

The SECURE 2K25 is the revolution in cybersecurity education, started by **Amith Sir**, Chairman of SAVORY MINDS company. The main goal is to provide hands-on learning and real industry knowledge, bridging the wide gap between college curriculum and actual job demands.

My Situation Before Joining Secure 2k25 :

I am really confused and searching for something solid that could actually prepare me for the real-world cybersecurity field . I looked into various online platforms and online websites and coaching centers even places like Ameerpet, Bengaluru . But I kept hearing the same problems like no proper placements, mixed student batches(different passed out) , high fees which cost around 60k-1Lakh(above) with low-quality teaching. Honestly, it all felt like a gamble.

Why Secure 2k25 is Different :

But Secure 2K25 changed everything. Unlike the 4-year B.Tech course which is mostly theoretical, this program is “intensive and practical”

- ➔ The Content quality is Exceptional and More than 10 times to international standards
- ➔ The learning is Fully Hands-on and concept clearness with practical and real time examples
- ➔ The most importantly, Amith sir's teaching style is on another level with Research-driven, advanced, and student-focused
- ➔ We are training in Multiple domains:

- SOC Analyst
- Penetration Testing
- Bug Bounty
- Cyber Automation (Manual and Intelligent)
- Blockchain Technology
- AI, Machine Learning, and Generative AI
- Communication Skills

This kind of multi-domain exposure is something I could never get in college and other platforms and institutes

My Transformation :

Since joining my Technical knowledge and communication skills have grown rapidly. I've gained so much confidence not just in interviews, but in understanding real tools and technologies. Amith Sir gives attention to each and every student, something you won't get anywhere else not even from AI tools like ChatGPT or DeepSeek.

Inclusive for Everyone :

One of the best parts There's no language barrier. No matter your background, stream, or skill level you're taught everything from scratch , step by step.

Affordable and Worth Every Rupee :

What we're getting here would cost lakhs in other institutes, but Savory Minds offers it at a very affordable price, with EMI options too and also considering the financial problems and providing extra time to pay. It's not just a program it's a mission to uplift students to get more successful in their career, not a money-making business

Final Thoughts :

Before joining, I was unsure about my future. Now, I have clarity, confidence, and direction. I truly feel like a real engineer,

equipped with practical skills and industry knowledge that my B.Tech program never provided.

Closing Statement :

Amit Sir started this mission after seeing students like us struggle and I'm so thankful he did. This initiative is changing our lives. It's changing the education system. I genuinely recommend SECURE 2K25 to every student who wants to build a real career in cybersecurity. I feel proud from my bottom of my heart to be a part of Secure 2K25 and thank you Amith Sir and Savory Minds for this wonderful opportunity and which helps to build wonderful career and proves me to my parents as good son.
